Frontend
React.js, Next.js, HTML5, CSS3, EJS

Backend & Database
Node.js, Express.js, REST APIs, MongoDB

Tools
Git, GitHub, VS Code, npm, Android Emulator, ADB, Render; AI-assisted development

Testing
Functional testing

Professional Summary

Computer Science graduate with project experience building web and Android applications using Next.js, TypeScript, Node.js and MongoDB. Develops practical workflows, integrates REST APIs and performs functional testing. Seeking an entry-level software development opportunity.

Projects

BillSahi | Business Management Software

Next.js, TypeScript, MongoDB, React Native

- Developed web and Android applications to support daily business operations.
- Defined user-scoped MongoDB indexes for stock and sales queries, with unique invoice numbers per user.
- Desktop application is under development.

Cafe Flex | Cafe Management

React Native, Android, Local Wi-Fi

- Built an Android POS with TCP-based local networking, heartbeat checks and capped reconnection backoff.
- Persisted pending staff commands locally and flushed the queue after reconnecting.

Personal Portfolio | nowman.site

Next.js, React.js, TypeScript, CSS

- Designed and built a responsive developer portfolio to showcase projects, technical skills, education and certifications.
- Created interactive project cards, mobile navigation and a downloadable resume.
- Portfolio: https://nowman.site
